

ENA JOHN EGBE

Process Automation Specialist · Health Informatics Student · Product Management

<https://enajo.github.io/portfolio> · enajohnegbe@gmail.com · +49 152 15899157 · Pfarrkirchen, Bavaria, Germany

PROFESSIONAL PROFILE

Process automation specialist and Health Informatics student with 4+ years of experience spanning engineering, product management, and UX across fintech, healthtech, and higher education. Led cross-functional teams to ship full-stack products from problem definition to deployment, while also building the integrations, dashboards, and workflows that keep operations running. Currently driving end-to-end automation at Hawk.ai (Munich). Comfortable in the code, in the roadmap, and in the room with stakeholders.

PROFESSIONAL EXPERIENCE

Process Optimization Specialist | *Hawk.ai, Munich* Aug 2023 – Present

- Designed and deployed end-to-end automation of core business processes using Pipedream and Power Automate, eliminating repetitive manual tasks across operations and engineering teams.
- Served as Jira System Administrator, designing advanced workflows, automation rules, and permission schemes, and integrating Jira with external platforms including GitHub and HubSpot.
- Co-administered Slack workspace; built custom bots, automated notification workflows, and system alert integrations that improved cross-team response times.
- Built and maintained Power BI dashboards consolidating data from HubSpot, GitHub, Google Sheets, and Excel, providing leadership with real-time visibility into key operational metrics.

Student IT Support Technician | *Deggendorf Institute of Technology, Pfarrkirchen* Oct 2023 – Present

- Deliver first-line IT support to 200+ students and staff, resolving hardware, software, and network issues across campus systems and devices.
- Managed user onboarding, account provisioning, and device configuration for new semester intakes.
- Reduced repeat support tickets by creating internal documentation and self-service troubleshooting guides.

Student Research Assistant | *Deggendorf Institute of Technology, Pfarrkirchen* Aug 2024 – Sep 2024

- Configured and deployed a GazeTracking research project on Windows using VSCode, Python virtual environments, and complex dependency chains including dlib, numpy, CMake, and build toolchains.
- Resolved critical installation blockers preventing project deployment; documented step-by-step solutions that reduced onboarding time for future contributors.

IT Officer | *Guaranty Trust Bank, The Gambia* Feb 2022 – Mar 2023

- Provided end-to-end support for the bank's Core Banking System (CBS), ensuring uptime and reliability for daily banking operations.
- Managed critical subsystems including ATM networks, POS terminals, card services, and e-business platforms.
- Coordinated with vendors and internal teams to resolve system incidents and implement infrastructure updates.

EDUCATION

B.Sc. Health Informatics | *Deggendorf Institute of Technology, Pfarrkirchen* Oct 2023 – Present

Expected graduation: 2026 · Relevant modules: Healthcare Data Systems, Medical IT Infrastructure, Digital Health Applications

KEY PROJECTS & TECHNICAL CONTRIBUTIONS

- Jira Automation Suite ([Hawk.ai](#)): Designed and deployed a comprehensive set of automation rules across Jira projects, reducing manual triage time and integrating alerts into Slack and email channels.
- GazeTracking Research Deployment: Independently resolved multi-layer Python/C++ dependency issues across a research environment, producing reusable documentation adopted by the research team.
- Power BI Reporting Pipeline: Built automated multi-source dashboards replacing manual weekly Excel reports, saving an estimated 3–5 hours of analyst time per week.

TECHNICAL SKILLS

Automation & Integration

Pipedream, Power Automate, Zapier-style API integrations, webhook-driven workflows

Business Intelligence & Data

Power BI, Google Sheets, Excel (advanced), SQL, HubSpot CRM, data pipeline design

Systems & DevOps

Jira (System Admin), Slack (Workspace Admin), Git, Linux/Bash, Zendesk, Incident.io

Development

Python (Very Good), Java (Very Good), C++ (Good), SQL (Very Good), Godot (Very Good)

Design & Productivity

Figma (UI/UX prototyping), MS Office Suite

CERTIFICATIONS

- Google Cloud Professional Architect: In progress (expected 2026)
- Google Data Analytics Professional Certificate: 2024
- Google IT Support Professional Certificate: 2023
- Google UX Design Professional Certificate: 2022

LANGUAGES

- English: Business fluent
- German: Intermediate (B1)
